

Our Lady of the Wayside is grateful for two grants from the Reinberger Foundation and the Murch Foundation. Both of these fine organizations have been vital long time supporters of the agency and its quest to provide quality services to individuals with disabilities. A \$25,000 bridge grant from the Reinberger Foundation will assist the agency in sustaining healthcare services to each resident. Over the past several years Reinberger has granted \$350,000 for vital agency services. The Reinberger Foundation was established in 1966 and is committed to supporting organizations in healthcare, arts, education and social services. The Murch Foundation created in 1958, promotes the arts, health, social and human services and education. Foundation support is critical to Our Lady of the Wayside, although the agency receives a majority of its funding from government sources; an ever expanding shortfall exists each year. This gap must be filled in order to maintain the important services upon which our residents and families depend.
